PRC Risk Suite – Free Licenses for Covid 19 Emergency Response & Recovery Projects

PRC Software will be donating one-year subscriptions for the PRC Risk Suite to all Covid 19 Emergency Response and Recovery projects worldwide. Project, programme or portfolio managers may use as many licenses as they can find benefit from. This offer is extended to organizations such as FEMA in the United States and any related subcontractors.

We will also extend a 50% discount to all other organizations with free training and consulting as we are all impacted and in this together. This is a high risk time and every penny must be maximized to save lives.

There are no hidden fees or locked-in contracts. We do not have an expiration on this offer as we do not know when this difficult period will end.

Our team is dedicated to providing free implementation support, training and consulting to help these fast-tracked emergency projects. We can help you to quickly and efficiently gain visibility to your threats and opportunities. You will act faster on your mitigation plans.

Every decision matters during this crisis. It is critical that every penny is maximized to save lives.

The PRC Risk Suite Includes:

- **PRC Enterprise Risk Register** – Collaborate and report on threats, opportunities and mitigation plans in real-time.
- **PRC Cost Risk Analysis** – Cost Monte Carlo Analysis to set your contingency budgets accurately and do options analysis.
- **PRC Schedule Risk Analysis** – Schedule Monte Carlo Analysis to come in on time and fine-tune mitigation & recovery plans.

Proper risk management right now is more important than ever. Please let us know how we can help.
